Claim Rejections - 35 USC § 112

1. Claims 1-3, 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the phrase "a slit-shaped groove" near either said first side wall or said second side wall... substantially parallel to said first and second side walls" is indefinite. The grooves appear to be perpendicular to the sidewall in a closed and an open position. Applicant needs to clarify in what position is the groove parallel to the sidewalls. Also, the slit shape although in the claim is not in the specification. Appropriate amendment should be made to the specification as well. Appropriate correction is required.

Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-2,5,7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Moren et al. (US 6,142,304). Moren et al. discloses a lower plate, two side plates 54 and a first, third, fourth and sixth auxiliary side walls 70L extending from the respective end of the first and second side walls. A center 70L is considered the second and fifth auxiliary side walls on the respective first and second side walls. A cover or upper plate 140 may be integrally formed with either of the packing apparatus 10 and 100. Each of the lower plate, side plates and upper plate has a plurality of fixing jaws, for example, elements 70L in between the two outermost 70L on each end minus

Application/Control Number: 09/778,748

Art Unit: 3728

the center piece, elements 32,70S,152. A plurality of projections and grooves are formed on the surfaces. Also, the upper plate has at least one groove 146,156 as shown in Figure 18 formed adjacent to the side edge near the first and second sidewalls and a plurality of grooves as shown in the cover in Figure 1 formed by the ribs. The groove is substantially parallel to the sidewall when the entire display module is in an unassembled condition. The first side wall has a plurality of grooves 80. The first and second sidewalls are foldably connected to the lower plate and the upper plate is foldably connected to the first side wall.

4. Claim 3 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over anticipated by Moren et al. Moren et al. discloses a plurality of projections (for example 42,44 and what is shown in Figure 11 between the ribs on 70S,70L and the raised projection on the top portion of 70S and 70L), having alternating step shape. In the event that the configuration is not a step shape, it would have been obvious to provide any of variety of shape for the ribs since they perform equivalent function.

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all
 obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moren et al. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the packaging out of resin, since it has been held to be within the general skill of a

Application/Control Number: 09/778,748

Art Unit: 3728

worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPO 416.

Conclusion

5. Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners, M.P.E.P. 203.08.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers should be directed to Erica Miller at (571) 272-4370.

For applicant's convenience, the official FAX number is (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify Examiner <u>Luong</u> of Art Unit <u>3728</u> at the top of your cover sheet of any correspondence submitted.

Inquiries concerning the merits of the examination should be directed to Shian Luong whose telephone number is (571) 272-4557. The examiner can normally be reached on M-H from 7:00am to 4:00pm EST.
